

**CENTRAL CAMPUS
CHM 1046L
STUDENT INFORMATION**

Each student is assigned his/her own drawer for storage of samples, reagents, and glassware. The **keys always stay in the lab**. Return your assigned 1046L key to your instructor at the end of the lab after **locking your drawer**.

All of your glassware and equipment from your drawer needs to be **cleaned and replaced** back in your drawer before you lock it and leave the lab.

Do not put glassware or equipment you took from the front counter in the drawers. These must be returned to the front counter for other students to use.

If your **reagent dropper bottles in your assigned drawer** need to be refilled, take them to your instructor, he/she will refill them from the stock bottles.
