Hazardous Chemical Waste

Generator ID# FLD 981 028 954

Labeling

All Hazardous Waste bottles and jars must be labeled with a red label stating that it is a Hazardous Waste. Place the signal word below and place the chemical name or solution under that. Then add the appropriate GHS pictograms.

When the bottle or jar is filled (90% only-this allows for expansion of contents) place a tamper resistant label over the lid and top of bottle or jar so it cannot be accessed again.

Storage

All bottles and jars are to be placed in the labeled flammable cabinet for Hazardous Waste in Room 257.

Inventory List

The Hazard Chemical Waste inventory hanging on the flammable cabinet contains an information sheet for each generated waste stream.

Disposal

An independent Florida waste removal contractor will be scheduled once a year, unless otherwise needed, to remove and dispose of the Hazardous Waste according to state and federal law.
